All graduate students must complete 46 credit hours: 40 credit hours academic and 6 credit hours of clinical practicum.

Policy: Students are required to enroll in one of the clinical practicum courses every semester.

It is a requirement of the Communication Sciences and Disorders Graduate Program that all students complete a course in Aural Rehabilitation and Neurological Bases of Communication. Students who have not had these courses as an undergraduate will need to take them in the graduate program in addition to the Master's program requirements.

(E): Electives. Four (4) credit hours of electives are required. Thesis credit hours meet the elective requirements.
